Northern California Junior Cricket Program

Our Mission is to introduce cricket to children of all social and ethnic groups in an education program within the U.S. school system. And to prepare them through this and other junior programs to play socially, and within age-related groups, in local, state, national and international competitions.

Youngsters participating in the program develop sportsmanship, life skills, decision making skills, respect for authority and most of all, respect for their fellow players.

Cricket is an ideal sport for girls and boys of all ages and abilities, apart from the obvious benefits of sporting activity, such as improving hand-eye coordination and increasing physical fitness, competitive cricket also requires strong elements of self-control, patience, strategic and tactical thinking.
